World Index of Plastics Standards

Leslie H. Breden, Editor

This computer-produced Index contains the printed titles of more than 9,000 national and international standards on plastics and related materials which were in effect as of December 31, 1970. These standards are published by technical societies, trade associations, government agencies and military organizations. The title of each standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. The date of publication or last revision, the standard number, and an acronym designating the standard-issuing organization appear as part of each entry. A list of these acronyms and the names and addresses of the organizations which they represent are found at the beginning of the World Index.

Key words: Index of plastics standards; plastics standards, world index; standards, plastics.

1. Introduction

This *World Index of Plastics Standards* is a computer-produced index which contains the titles of more than 9,000 national and international standards on plastics and related materials which were in effect as of December 31, 1970. It brings together in one document titles of relevant standards published by technical societies, trade associations, government agencies, and standardization bodies. This Index is intended to serve as a reference for design engineers, purchasing agents, and others who want to know if there are standards covering a particular plastics material, product, or test method.

The standards listed in this Index were selected because their titles indicated either that they were specifically concerned with plastics or that they covered other areas which might be useful to plastics engineers or testing laboratories. No attempt has been made to evaluate the contents of the standards. Translations of international standards titles found in the Index have, in most cases, been taken from information provided by the standards-issuing group involved. However, many of the translations are only approximate.

Requests for copies of all standards referenced in this Index should be addressed to the issuing organization. Suggestions for improving the Index and comments concerning omissions or corrections are welcome. These may be sent to the Office of Engineering and Information Processing Standards, National Bureau of Standards, Washington, D.C. 20234.

2. Instructions for Using the Key-Word-in-Context (KWIC) Index

A KWIC entry may contain as many as six items of information as shown below:

(1)	(2)	(3)	(4)	(5)	(6)
Polyethylene Film	(1963)	NFX	B1	USC	CS 227

(1) Title of the standard
(2) Year of publication or last revision
(3) Cross reference acronym for National Flexible Packaging Association
(4) Number assigned by National Flexible Packaging Association
(5) Acronym for U.S. Department of Commerce
(6) Number assigned by the U.S. Department of Commerce

The first item of information given is the title of the standard. The title of each standard is found under all of the significant key words it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. There are as many listings of each title as there are key words in the title. It should be noted that, in some instances, the title has been augmented to include additional descriptive terms. Nonessential words have been omitted from the title in some cases.

The second item following the title is the year of publication or last revision of the standard. The letter "T" following this date indicates that the document is a tentative standard and not officially approved by the issuing organization.

The third and fourth items, which will be included only when applicable, consist of cross references, (acronym and number) to other organizations, besides the group originally issuing the standard, which have approved or adopted the standard and have assigned a number to it.

The last two items of information given make up the standard's identification number. This alphanumeric number is always found in the right-hand column. The first item is an acronym identifying the group issuing the standard. The second item is the standard number assigned by the issuing group. The letters "DR" preceding this number indicate that the document is a draft standard and not officially approved by the issuing organization. If an organization has not assigned a number to a standard, there appears the designation "XYZ" before an arbitrary number.

Index entries are read from left to right beginning after the largest blank space. When the title is larger than the programmed space, the additional title words appear in front of the title as shown below:

Resin in Solution (1965) Test for Viscosity Number of Polyvinyl Chloride BSI BD2892

Each title is assigned only one line in the Index; therefore, titles larger than one line have been cut by the computer. This deletion is indicated by a virgule (/) at the point where the title was cut. Missing portions of the title can be found by locating the entries for other key words in the title.

The editor gratefully acknowledges the assistance of the Plastics Technical Evaluation Center at Picatinny Arsenal for help in the compilation of the Federal and Military plastics standards. Also, thanks are given to Michael Keplinger of the Computer Information Section of the National Bureau of Standards for preparing the basic computer programs used in generating this Index.

rigid Polyvinyl Chloride Pipe for Pressure and Nonpressure — Applications (1969) — SAA K138
Urethane Foam Laminates for Garment — Applications (1969) — SAA K180
Varnish, Finishing, Baking, for Roller Coat — Applications, Epoxy, Vinyl, or Alkyd (1958) — MIL V21064
cushioning Material, Cellular, Plastic Film, for Packaging — Applications, Polyethylene Bubble Film (1964) — FED PPPC795
Sealing Compound, Two Component, Jet Fuel Resistant, Cold — Applied Concrete Paving (1955) — FED SSS170
Test Method for Drycleaning Durability of — Applied Designs and Finishes (1963) USA L014.121 — ATC 86
Solvent Resistance of — Applied Marking Materials (1966) — EIA RS327
Coatings of Paint, Varnish, Lacquer, and Related Products — Applied on a Magnetic Base (1961) /hickness of Nonmagnetic — AST D1186
Coatings of Paint, Varnish, Lacquer, and Related Products — Applied on a Nonmagnetic Metal Base (1967) /of Nonmetallic — AST D1400
tion (1966) Standard — Applied Pipe Coating Weights for Use with Coating Specifica — NPC 2
re Change Resistance of Clear Nitrocellulose Lacquer Films — Applied to Wood (1964) Test for Temperatu — AST D1211
Road Marking Materials Thermoplastic Materials Hot — Applied (1960) — BSI 3262
Specifying Wall Covering, Laminated Plastic, Field — Applied (1967) — CSI 906
g Compound, Two Component, Elastomeric, Polymer Type, Cold — Applied, Concrete Paving Joints (1963) Sealin — FED SSS200
g Compound, Two Component, Elastomeric, Polymer Type, Cold — Applied, Concrete Paving Joints (1966) Sealin — FED SSS195
Decal, Water — Applied, Solvent Removable Type (1970) — TX 194-35-2
Test and — Approval of Household Electrical Appliances (1969) — BSI 3456
Power Supply Cable for Use with — Approved Portable Apparatus (1964) — CSA C22.296
reight Service (1959) Specifications for — Approved Reconditioned Draft Gears, Other Than Rubber for F — AAR M901B
— Approved Rubber Draft Gears for Freight Service (1957) — AAR M901A
ng Reinforced Plastic Materials, Pipe, Fittings, Tanks and — Appurtenances for Use in Potable Water Systems (1960) /tti — NSF C3
— Apron, Dental, Plastic (1964) — MIL A36188
— Apron, Laboratory, Plastic (1966) — MIL A46801
Protective — Aprons Chloroprene Coated (1960) — BSI 3314
Rubber — Aprons for Hospital Use (1962) — BSI 2507
X-Ray Lead Rubber Protective — Aprons for Personal Use (1964) — BSI 3783
X-Ray Lead Rubber Protective — Aprons for Personal Use (1966) — NZS 2103
— Aprons, Rubberized, Acid and Alkali Resistant (1967) — ISI 4501
Standard Method of Test for Nonvolatile Content of — Aqueous Adhesives (1960) — AST D1489
on of Ph) (1969) — Aqueous Dispersions of Polymers and Copolymers (Determinati — ISO R1148
on of Dry Solids Content at 105 Degrees Centigrade) (197/ — Aqueous Dispersions of Polymers and Copolymers (Determinati — ISO R1625
Cycle Stability Test (1969) — Aqueous Dispersions of Polymers and Copolymers, Freeze Thaw — ISO R1147
on of the White Point Temperature of Polymer and Copolymer — Aqueous Dispersions (1970) Determinati — ISO XYZDR52
f a Thick Film for Tensile Test From Polymer and Copolymer — Aqueous Dispersions (1970) Preparation O — ISO XYZDR53
Film Prepared for This Purpose From Polymer and Copolymer — Aqueous Dispersions (1970) /ile Characteristics of a Thick — ISO XYZDR41
Determination of Ph — Aqueous Extract for Polyvinyl Chloride Resins (1970) — ISO DR1264
constant Relative Humidity in Small Enclosures by Means of — Aqueous Solutions (1966) Methods for Maintaining — ISO R483
test Method for Colorfastness to Light, Water Cooled Xenon — Arc Lamp Alternate Light and Darkness (1964) USA L014.171 — ATC 16F
test Method for Colorfastness to Light, Water Cooled Xenon — Arc Lamp Continuous Light (1964) USA L014.170 — ATC 16E
mmended Practice for Exposure of Plastics to S-One Mercury — Arc Lamp (1965t) Tentative Reco — AST D795
Test Method for Colorfastness to Light, Carbon — Arc Lamp, Alternate Light and Darkness (1964) USA L014.169 — ATC 16D
Standard Colorfastness to Light, Carbon — Arc Lamp, Continuous Light (1964) USA L014.53 — ATC 16A
ecommended Practice for Determining Light Dosage in Carbon — Arc Light Aging Apparatus (1969t) Tentative R — AST D1920
Recommended Practice for Operating Carbon — Arc Light and Water Exposure of Nonmetallic Materials (1969 — AST E42
61/ Standard Method of Test for High Voltage, Low Current — Arc Resistance of Solid Electrical Insulating Materials (19 — AST D495
Test for — Arc Resistance (1970) — FED 4064011
Testing of Insulating Materials,determination of — Arc Resistance(68) — DIN 53484
Phenolic Resin,flameand — Arc Resistant ,asbestos Filled,molded Parts (1965) — MIL M21556
for E/ Tentative Recommended Practice for Operating Xenon — Arc Type (Water Cooled) Light and Water Exposure Apparatus — AST D2565
Practice for Determining the Effect of Artificial (Carbon — Arc Type) and Natural Light on the Permanence of Adhesives — AST D904
for Operating Light and Weather Exposure Apparatus (Carbon — Arc Type) for Artificial Weather Testing of Rubber Compound — AST D750
e for Operating Light and Water Exposure Apparatus (Carbon — Arc Type) for Exposure of Plastics (1964) /mmended Practic — AST D1499
e for Operating Light and Water Exposure Apparatus (Carbon — Arc Type) for Testing Paint, Varnish, Lacquer and Related P — AST D822
Test for Exposure to Carbon — Arc (1968) — AFN NFT51057
Test for Exposure to Xenon — Arc (1968) — AFN NFT51058
to Color Change Upon Exposure to Light the Enclosed Carbon — Arc (1968) Determination of Resistance of Plastics — ISO R878
Test for Accelerated Weathering Carbon — Arc (1970) — FED 4066022
Bow, String Length and Wood Arrow — (Archery) Standards (1968) — AM XYZ1
— Architects, Engineers and Surveyors Scales (1959) — BSI 1347
— Architectural Decorative Plastic Laminate (1965) — NPL 1005
Fabric Weight Per Unit — Area of Knitted Piece Goods (Conditioned Weight) (1964) — SAB M385
Test for the Weight Per Unit Length and Per Unit — Area of Woven or Knitted Fabrics (1954) — BSI 2471
esting of Artificial Leather Leather, Determination of the — Area Weight of an Artificial Leather Cloth Coating (1968) — DIN 53358
Testing of Artificial Leather,determination of — Area Weight (1968) — DIN 53352
Scale, — Area, Transparent Plastic, Acrylic or Vinyl (1964) — FED GGS150
ber or Polyvinyl Chloride Cables/ Nominal Cross-Sectional — Areas and Composition of Circular Copper Conductors for Rub — IEC 180
Picture — Areas of Motion Picture Films for Television (1964) — BSI 2962
ndustrial Noise Affecting Mixed Residential and Industrial — Areas (1967) Method of Rating I — BSI 4142
pecification for (1953) Transparent — Areas, Deicing, Defrosting and Defogging Systems, General S — MIL T5842

Template, Flow Chart,	Plastic, AFLC Data System (1963)			MIL	T9967
ural or Synthetic, Vinyl Chlor/ Cloth, Coated, Rubber and	Plastic, and Plastic Sheeting for Hospital Use, Rubber, Nat			FED	ZZC450
Washer, Starter,	Plastic, Antirattle (1963)			MIL	MS17819
Tube,drinking,	Plastic, Bent (1964)			MIL	T36261
Overshoe, Service, Woman's	Plastic, Black (1967)			MIL	O43133
rate Cellulose Acetate Propionate, Ionomer, or Poly/ Box,	Plastic, Compartmented, Small Parts, Cellulose Acetate Buty			MIL	B3889
Bag,	Plastic, Contaminated Waste Disposal (1966)			MIL	B43444
Dropcloths, Painters,	Plastic, Cotton Cloth, Duck (1968)			FED	DDDD690
Cup,	Plastic, Creamer, Lid, Paper Disposable Cup (1966)			FED	LC1129
Lamp, Cartridge, Stovepipe, Plug In, Neon,	Plastic, Curved Lens Type (1968)			MIL	MS18236
Ruler,	Plastic, Desk (1967)			FED	GGR1200
in Phenolic Moldings (1968) Testing of	Plastic, Detection of Free Ammonia and Other Volatile Bases			DIN	53708
etically Sealed in Met/ Capacitor, Fixed, Paper, or Paper	Plastic, Dielectric, Direct Current, High Reliability, Herm			MIL	C14157
eral Specificat/ Capacitor, Fixed, Plastic, or Metallized	Plastic, Dielectric, Direct Current, in Nonmetal Cases, Gen			MIL	C55514
ic, or Glass Cases,/ Capacitors, Fixed, Plastic, or Paper	Plastic, Dielectric, Hermetically Sealed in Metallic, Ceram			MIL	C19978
Mouthpiece, Saliva Ejector, Dental,	Plastic, Disposable (1964)			MIL	M36231
Tip Assortment, Uterine Cannula,	Plastic, Disposable (1964)			MIL	T36236
Bag, Urine Collection,	Plastic, Disposable (1965)			MIL	B36419
Bag, Urine Collection, Pediatric,	Plastic, Disposable (1965)			MIL	B36444
Cup, Paper, Lids, Paper or Lids	Plastic, Disposable (1967)			FED	UUC806
Cover, Headrest,	Plastic, Disposable (1967)			MIL	C36205
Bottle, Screw Cap, Narrow Mouth,	Plastic, Distilled Water Storage (1965)			MIL	MS36361
Grommet, Flat,	Plastic, Drainage (1951)			FED	AN952
Cap,	Plastic, Dust, an Electric Connector (1960)			MIL	MS25177
Grommet,	Plastic, Edging (1961)			MIL	MS21266
Whistle, Ball,	Plastic, Ethyl Cellulose, Cellulose Acetate Butyrate (1969)			MIL	W1053
Soapbox,	Plastic, Ethyl Cellulose, Polyethylene (1967)			MIL	S1491
Specifying Wall Covering, Laminated	Plastic, Field Applied (1967)			CSI	906
Tile,	Plastic, Fire Retardant (1965)			MIL	T18830
Lamp, Cartridge, Long Cylindrical, Plug In, Neon,	Plastic, Flat Lens Type (1968)			MIL	MS18237
Lenses, Indicator Light, Incandescent,	Plastic, Flush Type (1964)			MIL	MS17140
Coating,	Plastic, for Canvas and Cotton Drill (1968)			MIL	C15275
67) Packing Material,	Plastic, for Dogs for Water Tight Closures, Symbol 1425 (19			MIL	P17578
Pipe and Pipe Fitting,	Plastic, for Drain, Waste, and Vent Service (1968)			MIL	P82056
Fastener,	Plastic, for Equipage Items (1967)			MIL	F43514
Connector,	Plastic, for Flexible Tubing (1961)			FED	NNNC550
Ogive,	Plastic, for Fuze MK 29 (1955)			MIL	O18521
Covering, Organic	Plastic, for Instrument Bodies (1961)			MIL	C2910
Plug, Protective and Preservative,	Plastic, for Internal Threads, Polyethylene (1955)			MIL	P18901
Insulation Tape, Electrical, Pressure Sensitive Adhesive,	Plastic, for Low Temperature Application (1966)			FED	HHI595
Compound, Caulking,	Plastic, for Masonry and Other Structures (1965)			FED	TTC598
Spoon, Knife, Fork, Picnic,	Plastic, for Rations (1964)			MIL	S676
Support, Molded,	Plastic, for Use in Ammunition Packaging (1968)			MIL	S60997
Container, Ammunition,	Plastic, for 60mm Mortar Ammunition (1967)			MIL	C60424
Hose, Nonmetallic, Rubber,	Plastic, Garden Hose Soakers (1966)			FED	LH520
Protractors, Semicircular,	Plastic, Graduated in Mils, Yards and Meters (1957)			MIL	P20385
,000 Scales, Vinyl Chloride/ Scale, Plotting, Coordinate,	Plastic, Graduated in Yards and Meters in 1/25,000 and 1/50			MIL	S2412

	Measure, Liquid,	Plastic, Graduated (1967)	MIL	M43530
	Pail, Rubber or	Plastic, Graduated (1968)	MIL	P52415
	Overshoe, Woman's,	Plastic, Gray (1967)	MIL	O41838
	Box,	Plastic, Hardware, Tote (1965)	MIL	B43159
	Plugs,	Plastic, Heat Exchange Tube (1959)	MIL	P15742
	Sleeve,	Plastic, Histopathological Specimen (1964)	MIL	S36230
	Spec. for Mattress Cover, Removable,	Plastic, Hospital Use (1968) GSA L-P-375 GSA V-F-106	CA	81-83-51

Test for Incandescence

Resistance of Electrical Insulating Materials with Controll AST D2302
Resistance of Emulsion Paints in the Container to Attack by AST D2574
Resistance of Exterior House Paints on Wood (1965t) Te AST D2366
Resistance of Fabrics to Mildew and Rot and Evaluation (197 PHI 27
Resistance of Fabrics to Penetration by Water (Hydrostatic ISO R811
Resistance of Fabrics to Penetration by Water (1968) BSI 2823
Resistance of Fabrics to Water Absorption (1961) BSI 3449
Resistance of Fabrics with Horizontal Sample (1966) UNI 5805
Resistance of Fabrics (1966t) ATC 93
Resistance of Fabrics (1970) FED 1915320
Resistance of Fiber Products (1970) CNS 2690
Resistance of Film and Sheeting (1970) FED 4061121
Resistance of Films and Foils (1951) PI 3P-51
Resistance of Films and Sheets 1970 FED 4064052
Resistance of Flexible Urethane Foam Slab (1968) UNI 6351
Resistance of Foams (1963) AFN NFT56102
Resistance of Foams (1963) AFN NFT56104
Resistance of Household Products (1962) AFN NFT54011
Resistance of Ink on Printed Packaging Materials to Fats an PI 3P-54
Resistance of Insulated Conductor (1970) CNS 685
Resistance of Interior Latex Flat Wall Paints (1966t) AST D2486
Resistance of Latex and Emulsion Paints (1964t) AST D2243
Resistance of Manufactured Building Materials Made of Organ BSI 1982
Resistance of Organic Coatings (1965) AST D2204
Resistance of Organic Finishes (1965) AST D2248
Resistance of Packages and Containers by Spray Method (1961 JIS Z0216
Resistance of Pile Floor Coverings to Attack by Black Carpe AST D1116
Resistance of Plastic Film and Sheet (1966) AST D1004
Resistance of Plastic Film and Sheeting (1959) AST D1004 SPI VDT9
Resistance of Plastic Film and Thin Sheeting (1967) AST D1922
Resistance of Plastic Film Tape (1966) PST 58
Resistance of Plastic Films to Extraction by Chemicals (196 AST D1239
Resistance of Plastic or Rubber Piping and Sheeting to Term SAB M471
Resistance of Plastic Pipe (1970) AST D2924
Resistance of Plastic to Molds by Visual Examination (1967) GOS 13413
Resistance of Plastics and Electrical Insulating Materials AST D256
Resistance of Plastics at Subnormal and Supernormal Tempera AST D758
Resistance of Plastics to Accelerated Service Conditions (1 AST D756
Resistance of Plastics to Bacteria (1967t) AST D2676
Resistance of Plastics to Chemical Reagents (1964) SPI ERF19
Resistance of Plastics to Chemical Reagents (1967) AST D543
Resistance of Plastics to Chemical Substances (1961) ISO R175
Resistance of Plastics to Color Change Upon Exposure to Day ISO R877
Resistance of Plastics to Color Change Upon Exposure to Lig ISO R878
Resistance of Plastics to Color Change Upon Exposure to Lig ISO R879
Resistance of Plastics to Fungi by Visual Examination (1968 ISO R846
Resistance of Plastics to Fungi (1963) USA K065.20 AST D1924
Resistance of Plastics to Sulfide Staining (1965) AST D1712
Resistance of Plastics with a Light Box (1968) GOS 13916
Resistance of Plastics (1963) GOS 10456
Resistance of Plastics (1966) GOS 12020
Resistance of Plastics (1968) AST D2299
Resistance of Plastics (1968) GOS 13537
Resistance of Plastics (1969) AST D673
Resistance of Plastics (1970) FED 4066091
Resistance of Polyethylene Blow Molded Containers (1965t) AST D2463
Resistance of Polyethylene Film by the Free Falling Dart Me AST D1709
Resistance of Polyethylene (1968) GOS 13518
Resistance of Rigid Cellular Plastics to Simulated Service AST D2126
Resistance of Rigid Plastics (1961) ISO R179
Resistance of Rigid Plastics (1961) ISO R180
Resistance of Rigid Plastics (1968) UNI 6323
Resistance of Rigid Selfextinguishing Thermosetting Plastic ISO R181
Resistance of Rigid Selfextinguishing Thermosetting Plastic ISO XYZDR21
Resistance of Rubber and Elastomeric Materials by the Pico AST D2228
Resistance of Rubber at Extension (1966) GOS 408
Resistance of Rubber by Rebound After Compression (1968) GOS 13808
Resistance of Rubber Compounds (1965) AST D394
Resistance of Rubber Hose (1970) CNS 729
Resistance of Rubber Hose (1970) CNS 733
Resistance of Rubber Products (1970) CNS 734
Resistance of Rubber Soles and Heels (1961) AST D1630
Resistance of Rubber Thread to Washing (1967) EFM RT3
Resistance of Shipping Containers (Shower Method) (1955) TAP T805TS
Resistance of Shoe Laces (Without Core) (1964) SAB M316
Resistance of Shoe Laces (1964) SAB M421
Resistance of Solid Electrical Insulating Materials (1961) AST D495
Resistance of Solid Insulating Materials (1965) IEC 167
Resistance of Textile Fabrics (1963) USA L014 AST D583
Resistance of Textile Fabrics (1964t) AST D1175
Resistance of Textile Fabrics (1966) ATC 34
Resistance of Textile Yarns (1964) AST D1379
Resistance of Textiles to Insect (1963) USA L014.64 ATC 24
Resistance of Textiles (1957) USA L014.55 Test Me ATC 30
Resistance of Thermoplastic Pipe and Fittings by Means of a AST D2444
Resistance of Thermosetting Plastics (1965) UNI 5639

forced Structures /	Tentative Method of Test for Chemical	Resistance of Thermosetting Resins Used in Glass Fiber Rein	AST	C581

ANNOUNCEMENT OF SUPPLEMENTS AND REVISIONS
OF THE
NATIONAL BUREAU OF STANDARDS
SPECIAL PUBLICATION 352

Office of Engineering and
Information Processing Standards
National Bureau of Standards
Washington, D.C. 20234

Dear Sir:

Please add my name to the announcement list of supplements and revisions of National Bureau of Standards Special Publication 352, "World Index of Plastics Standards."

Name_____

Company_____

Address_____

City_____ State_____ Zip Code_____

Cut Here

FORM NBS-114A (1-71)

U.S. DEPT. OF COMM. BIBLIOGRAPHIC DATA SHEET	1. PUBLICATION OR REPORT NO. NBS-SP-352	2. Gov't Accession No.	3. Recipient's Accession No.

4. TITLE AND SUBTITLE

World Index of Plastics Standards

5. Publication Date: December 1971

6. Performing Organization Code

7. AUTHOR(S)
Leslie H. Breden, Editor

8. Performing Organization

9. PERFORMING ORGANIZATION NAME AND ADDRESS

NATIONAL BUREAU OF STANDARDS
DEPARTMENT OF COMMERCE
WASHINGTON, D.C. 20234

10. Project/Task/Work Unit No. 4000212

11. Contract/Grant No.

12. Sponsoring Organization Name and Address

Institute for Applied Technology
National Bureau of Standards
Washington, D.C. 20234

13. Type of Report & Period Covered

14. Sponsoring Agency Code

15. SUPPLEMENTARY NOTES

16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.)

This computer-produced Index contains the printed titles of more than 9,000 national and international standards on plastics and related materials which were in effect as of December 31, 1970. These standards are published by technical societies, trade associations, government agencies and military organizations. The title of each standard can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. The date of publication or last revision, the standard number, and an acronym designating the standard-issuing organization appear as part of each entry. A list of these acronyms and the names and addresses of the organizations which they represent are found at the beginning of the World Index.

17. KEY WORDS (Alphabetical order, separated by semicolons)
Index of plastics standards; plastics standards, world index; standards, plastics.

18. AVAILABILITY STATEMENT

[X] UNLIMITED.

[ ] FOR OFFICIAL DISTRIBUTION. DO NOT RELEASE TO NTIS.

19. SECURITY CLASS (THIS REPORT): X UNCLASSIFIED

21. NO. OF PAGES: 458
